A.D. 1885, 3d DECEMBER, N° 6972.

Confectionery Jewellery for Children

COMPLETE SPECIFICATION

I, JAMES W. WARR, of 18, Walker Terrace, Plymouth, do hereby declare the nature of my invention for confectionery, and in what manner it is to be used, and a certain and ready means of my invention is the production of such personal ornaments to be worn by children without incurring the risk of mischief to the child, and to be made of such substances as coral or other hard substances, which are worn by children from the habit inherent in the majority of juveniles, of putting small articles into their mouths, and of playing with things of pastimes, into their mouths, and retaining them therein, frequently resulting in the trinket or part of its finding its way into the child's or its stomach.

My invention prevents all such mischief as the swallowing, partial or complete, of the ornaments, and the means by which it is to be carried into effect, is effected in the manufacture of jewellery, by discarding such materials as are dangerous, and substituting them by confectionery.

My invention and the means by which it is to be carried into effect, is thoroughly understood, I will now describe the same in connection with the accompanying figures, which are to be taken in connection with the text, and read therewith.

1. A necklace made according to my invention, Fig. 1, is shown in perspective, and Fig. 2 is a detail.

2. In the necklace, the beads *a, a*, are of confectionery, and are made of such material, which is fastened to the chain by means of the same, caused to adhere to the threads.

3. The beads *a, a*, are made of such material, which is fastened to the chain by means of the same, caused to adhere to the threads.

4. The beads *a, a*, are made of such material, which is fastened to the chain by means of the same, caused to adhere to the threads.

5. The beads *a, a*, are made of such material, which is fastened to the chain by means of the same, caused to adhere to the threads.

6. The beads *a, a*, are made of such material, which is fastened to the chain by means of the same, caused to adhere to the threads.

7. The beads *a, a*, are made of such material, which is fastened to the chain by means of the same, caused to adhere to the threads.

8. The beads *a, a*, are made of such material, which is fastened to the chain by means of the same, caused to adhere to the threads.

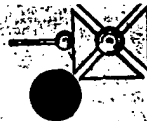

9. The beads *a, a*, are made of such material, which is fastened to the chain by means of the same, caused to adhere to the threads.

10. The beads *a, a*, are made of such material, which is fastened to the chain by means of the same, caused to adhere to the threads.
